👤 About Me

My greatest strength is my hands-on experience in planning, developing, and deploying services, much like assembling a model kit. As the leader of a team project, I proactively established a Github-based collaboration process and built the project's infrastructure. With my full-stack development skills and quick learning ability, I strive to solve problems and continue growing as a developer, even in challenging environments.

Skills

- **Frontend:** HTML, CSS, Javascript
- **Backend:** - Java, Spring Boot
- **Infra:** AWS EC2, Cloudflare R2
- **Version Control:** Git, Github
- **Language:** Japanese, English

🎓 Education

- **[Industry-Linked Project-Based] Full-Stack Developer Course**   2024.12 ~ 2025-07
  EZEN Academy Ansan Campus

- **Tourism Japanese**
  Yeoju University   2012 ~ 2013 (dismissed)

- **Photography**
  Anyang Arts High School   2009 ~ 2012

💼 Experience

- **Sambo Corrugated Board**
  Printing Machine Operation & Facilities   2021 ~ 2024

📖 Project Highlights

- **BirdClown**   2025-07 ~ Ongoing
  Promotion and Responsive Website Development for a Small Event Company

  <u>View Detail</u>   <u>Github Repository</u>

  Co-planned and developed the project with a team of two
  - Built a responsive website introducing the company's services, events, and on-site photo gallery
  - Designed a responsive UI/UX and provided clear contact information reflecting client requirements

  Implementation details and code available via the detailed career description and GitHub link

- **Charti**   2025-05 ~ 07(About 1 month)
  Planning, Designing, Deploying, and Leading Collaboration for a Survey-Based Healthcare Platform

  <u>View Detail</u>   <u>Github Repository</u>

  Oversaw the entire project and full-stack development as team leader
  - Led service design, scheduling, role management, infrastructure/database setup and migration, and collaboration framework
  - Gained hands-on experience in infant healthcare data collection, risk analysis, expert consultation, collaboration, deployment, and incident response

  Implementation details and code available via the detailed career description and GitHub link
